

Verto Mirror 2025

by Oleksandr Babenko

Description

The Verto mirror is 34th piece.

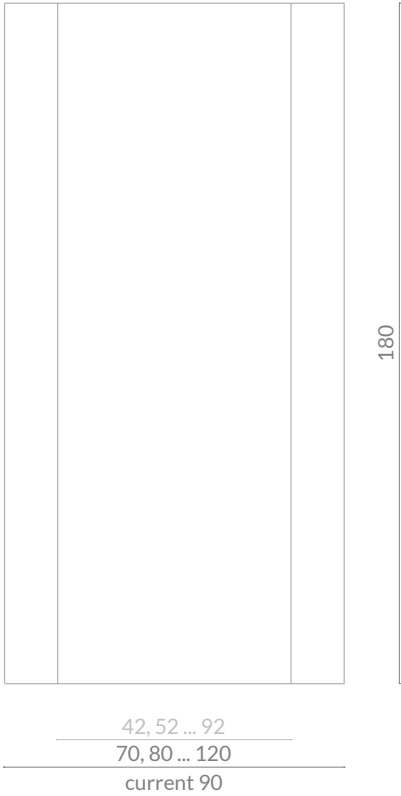

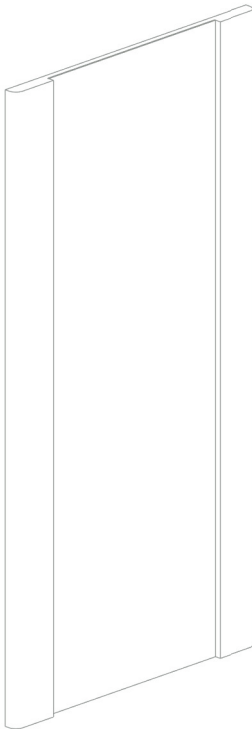

Designer Oleksandr Babenko created Verto as an exploration of the interaction between reflection and materiality.

In this mirror, he combines strict geometry with the tactile quality of fabric, creating an object that not only reflects space but also adds depth to it.

Verto is available in three mirror options — Bronze, Graphite, and Optiwhite — each offering its own play of light and shades. The fabric frame gives the mirror a softness and visual warmth, creating a harmonious balance between clean lines and a cozy texture. Various width options allow Verto to seamlessly integrate into interiors with different spatial solutions. This is not just a mirror, but an object that redefines reflection, turning it into an integral part of interior architecture.

Please note that:

1. We can produce our products in custom sizes. Contact us for a consultation.

2. Surfaces made of natural veneer/wood may vary slightly in texture and shade even when using the same finish. This is due to the uniqueness of each piece of wood, batch, and the region of its origin. We recommend purchasing items with the same veneer/wood finish as part of a single order for maximum consistency in the chosen finish.

3. Size discrepancies of soft furniture can reach up to 1-2 cm due to the natural properties of the filler and fabric.
